Introduction 1
  To Summarize 5
Marine Riser Systems 7
  Riser Pipe 9
  Riser Connectors 14
  Termination Spools 15
  Telescopic Joint 16
  Auxiliary Lines 22
  Handling Tools and Spiders 25
  Buoyant Riser Modules 28
  Lower Riser Marine Package (LMRP) 29
  To Summarize 34
Diverters 39
  To Summarize 42
Riser Tensioning Systems 43
  To Summarize 46
Guideline Tensioners 49
  To Summarize 51
Subsea Wellheads and Casing 53
  To Summarize 61
Subsea BOP Stacks 63
  BOP Stacks 66
  Hydraulic Connectors 71
  Ram Preventers 76
  Annular Preventers 86
  Subsea Gate Valves 92
  To Summarize 94
Choke Manifolds 97
  Chokes 98
  Gate Valves 100
  To Summarize 101
1. Riser pipe and connectors 9
2. Various components that make up a riser assembly 10
3. Automatic flooding valve 13
4. Cameron Load King connector 14
5. Cameron RF flanged connector 15
6. Dog-type riser connector 15
7. Termination joint, or spool 16
8. Telescopic joint 17
9. Hydraulic tensioner ring 18
10. Telescopic joint with hydraulic tensioner ring 19
11. Packer seals in a telescopic joint 20
12. Gooseneck terminations 21
13. Mechanical riser handling tool 25
14. Hydraulic riser handling tool 26
15. Riser-support spider 27
16. A support gimbal 27
17. Buoyant modules attached to riser joints 28
18. Lower riser marine package (LMRP) 29
19. Flexible joint 30
20. Ball joint 31
21. Miniature collet hydraulic connector 33
22. Diverter 39
23. Diverter that can close on open hole as well as the drill stem 40
24. Special pin connect (A) and connector with ball joint and riser adapter (B) 41
25. Riser tensioning system 43
26. Tensioner lines connected to a riser tensioner ring 44
27. Temporary guide base 54
28. Permanent guide base being landed on the temporary guide base 55
29. Conductor housing and CART 55
30. An 18¾-inch (476.3-mm) high-pressure wellhead 56
31. Connector locked and landed on subsea wellhead 57
32. BOP test tool 58
33. Casing hanger, seal assembly, and running tool 59
34. Casing hangers landed on wellheads of various sizes 60
35. Subsea BOP stack 63
36. Lower marine riser package (LMRP) 69
37. Vessel being moved off location (A) and LMRP and riser safely disconnected (B) 70
38. Cameron Model 70 connector 72
39. Cameron HC connector 73
40. ABB Vetco H4 connector 74
41. Pipe ram preventer closed on drill pipe 77
42. Ram blocks and fixed-bore packers in a pipe ram preventer 78
43. Variable bore packers for a pipe ram preventer 79
44. Blind-shear ram blocks 80
45. Cameron Wedge-Lock system 83
46. Hydril MPL (multiposition ram lock) 84
47. Tail shaft and clutch plates in a Hydril ram preventer 85
48. Clutch plate operation in Hydril MPL locking system 85
49. Varco Shaffer annular BOP 87
50. In an annular preventer, upward movement of the piston forces the packing element inward to seal on pipe 88
51. Cameron type D annular preventer 89
52. Hydril GL annular preventer 90
53. Cameron double unit annular BOP 91
54. Cameron dual MCS valve 92
55. WOM magnum valve 93
56. Choke manifold 97
57. Hydraulically-operated choke 99
58. Choke control panel for remote operation of the hydraulic choke 99
59. Manually-operated choke 100
60. Gate valve used in choke manifolds 101
61. Hydraulic control for subsea BOPs 112
62. Surface accumulator unit (front view) 113
63. Surface accumulator unit (back view) 113
64. Accumulator bottles 115
65. Pilot manifold 117
66. Pilot valve 117
67. Pressure gauges 119
68. BOP and LMRP stingers extended by hydraulic cylinders 122
69. Receptacle for receiving BOP and LRMP stingers 123
70. Top view of a stack pod stinger showing ports and segments 123
71. A stack pod stinger with segments in retracted position 124
72. Pod annular regulator 126
73. Typical ¼-inch (6.35-mm) SPM valve 128
74. Electric panels that allow remote operation of BOP components 130
75. Electronic MUX package mounted on a hydraulic control pod 135
76. Multiplex control system 139
77. Cable reels on a MUX system 140
78. SEM removed from housing for testing 141
79. An open SEM under test 142
